

Amendment to Specification

Please amend the paragraphs set forth at page 10, lines 1-5, as follows:

In alternative embodiments, ~~such as those shown in Figures 13 and 14, an~~ alternative hub assembly ~~29a, 29b~~ assembly may be utilized to mechanically or frictionally lock the structure 10 in its constructed configuration without requiring angle A to be more than 90 degrees and without requiring the outer ends OE of the strut members 16 to be above or higher than their inner ends IE.
